

Preliminary information form for health care and treatment 2.0

You have an appointment on: _____ / _____ 20____ at _____

This preliminary information form you have filled out will be used to help us draw up a health care and treatment plan for you together with you. The purpose of the health care and treatment plan is to support you in maintaining your own health and in the self-care of illnesses. There are also free-format questions in the questionnaire, and we hope that you will tell us about matters that press your mind so that we can take your situation into account more comprehensively. Take this preliminary information form and recent home monitoring forms (e.g. blood pressure, blood sugar, PEF, weight) with you to the appointment.
